Contract Issues

- Per Kim's request, Roger will use 12 ppb for MUNI-104B in Figure 2. If there is no change in the plume when using 12 ppb and 10 ppb for MUNI-104B, 10 ppb will be used for the other figures.
- Kim wants Roger to use the most reasonable conservative scenarios when re-calculating the estimated shallow and deep concentrations in MUNI-104B. Roger will send another version of the spreadsheet to Kim by end of day today or tomorrow morning, 31 July.
- Kim wants Roger and Tom to come up with a TER for the entire system.

Construction/Validation/Performance

- Weekly Construction Report: no issues to report, continuing to operate at EW-108S.
- Muscoy Validation Report: Kit has not received the final data in from Mark for the zone sampling, which is the only data still outstanding.
- 18-Month Report: URS will submit the Draft Final Report to EPA and CH2M Hill by 10 August, with comments due back no later than 15 August.
- Post Draft Final RA Report: URS will send the Report to EPA and CH2M Hill on 10 August, with comments due back by 20 August.
- Post Draft Final Cost & Performance Report: URS will submit to EPA and CH2M Hill on 3 August, with comments due back by 8 August.

General Discussion

- Kit will advise the team on a proposed date for the Final Inspection on EW-108S. Adam said that the Final Inspection would be included in the RA Report.
- URS will propose a due date for EW-108S by 3 August.
- Adam will send an email out to the team announcing his departure from URS and that Kit will be the new point of contact.
